*Education is not the filling of a bucket,  
but the lighting of a fire.*

W.B. Yeats

## THECHURCH IN THE HIGHLANDS EARLY CHILDHOOD CENTER

A nonsectarian nursery school serving White Plains for over 60 years. We are licensed by New York State Office of Child and Family Services to serve children ages two through five, offering morning, afternoon, full day programs, and afternoon Enrichment classes.

**Including:** Music, Science, Cooking, Fun with Friends, and Art, all of which are open to the community. We believe the best education for young children comes from a nurturing environment where children have the freedom to discover and explore their world through play. We strive to have a diverse community where all children are welcomed and respected for their individuality.

### PLAY IS WHAT WE DO

It is often said that play is the work of children - it is the way that children learn and make sense of the world. Through play, children are able to master many fundamental physical, social, emotional, and intellectual skills and concepts necessary for later learning. Children's gross motor and sensory motor skills are best learned while children are freely exploring and manipulating their world in a safe environment. The Church in the Highlands Early Childhood Center will provide this environment enabling your child to develop to their fullest potential.

## STAFF

Our staff provides a warm, nurturing home like environment where all children are safe and free to learn. All of our staff members meet the required NY State Office of Children and Family Services requirements. With their combination of experience, education, and enthusiasm a unique and beneficial program has been established in which each child can progress at their own rate with guidance and understanding.
